

Hammad Shahid

Senior Salesforce Consultant — FSC · Agentforce · Sales/Service Cloud · CPQ & Revenue Cloud · Integrations

Italy | +39 327 535 3171 | shahidhammad593@gmail.com

About Me

Salesforce consultant with 5+ years delivering end-to-end implementations across **Sales Cloud, Service Cloud, Financial Services Cloud (FSC), Experience Cloud, and Data Cloud** — from lead-to-order automation to Agentforce-powered agents. Comfortable on both sides of the table: leading discovery workshops with business stakeholders, then hands-on with configuration, Apex/LWC, integrations, and data migrations. Delivered a 230+ user Sales Cloud implementation with a 12-member team, cutting end-to-end process time by 40%. Currently implementing Revenue Cloud, with prior CPQ delivery. Architected a loan origination system on FSC's mortgage data model handling \$1B+ in monthly pipeline, and built custom AI agents integrating Salesforce with Microsoft Dynamics 365 Business Central for real-time financial statement generation. MSc in Data Science (University of Naples Federico II) enabling direct collaboration with AI and data teams. Open to relocation.

Key Strengths

- **End-to-end delivery** — full lifecycle from discovery workshops and requirements through configuration, UAT, training, and hypercare; led a 12-person delivery team
- **Sales Cloud & CPQ** — full lead-to-order automation (lead capture → opportunity → quotes/contracts → orders), QuickBooks Online integration for invoicing, CPQ delivery, Revenue Cloud implementation in progress
- **Service Cloud & Field Service** — omnichannel case management across 4 case types, Knowledge base, entitlements, SLAs, assignment rules, SMS integration, FSL work orders, scheduling and Field Service Mobile, automated document generation (Conga, PandaDoc) with e-signature (DocuSign)
- **Financial Services Cloud** — Mortgage data model, Financial Accounts, Client 360, Person Accounts, Relationship Groups, Action Plans, Business Rule Engine; loan origination at \$1B+ monthly pipeline and multi-billion-dollar government investment portfolios
- **Agentforce & AI** — 12 production agents (25+ Topics, 40+ Actions, 15 Prompt Templates), including portal agents for order-lifecycle queries and a custom Business Central agent for conversational financial reporting
- **Integrations & data** — REST/SOAP, ERP/CRM syncs (QuickBooks, Sage, Close, Dynamics), Data Cloud, SSO/SAML, migrations up to 3M records
- **Stakeholder Management & Collaboration** — led requirements across 12+ cross-functional teams, delivered 30+ projects with 92% client satisfaction, and collaborated directly with Architects, Functional Consultants, and QA teams across 25+ US and Canadian companies

Projects

1. **Sales Cloud lead-to-order transformation** — 230-250 users, led a 12-member delivery team; automated the full funnel from lead capture to order management with QuickBooks Online invoicing; 40% process-time reduction measured across the quote-to-order cycle

2. **FSC loan origination system** — mortgage data model, Business Rule Engine for automated underwriting decisions, integrated with external lending platforms (Newton, Velocity) via REST/SOAP APIs; built to handle \$1B+ monthly pipeline
3. **Federal government financing portfolio (FSC)** — asset management, bond tracking, and financial accounts for multi-billion-dollar investment holdings managed end-to-end in Salesforce (Government of Canada)
4. **Provincial development authority (brownfield FSC)** — refactored an inherited FSC org that wasn't scaling; restructured Financial Accounts and approval pipelines, then layered Agentforce on top (Ontario)
5. **Customer & partner portals (Experience Cloud)** — hundreds of users managing orders online; Agentforce agents explain order lifecycle conversationally
6. **Service Cloud + Field Service Lightning** — omnichannel case management, Knowledge base, SLAs, SMS, work-order scheduling with Field Service Mobile, automated PDF generation
7. **Business Central AI agent** — Agentforce-based agent querying Microsoft Dynamics 365 live; conversational financial statements for 30+ portfolio companies without data imports
8. **ERP/CRM integrations & Data Cloud** — connected Sage, QuickBooks, and Close with Salesforce; Data Cloud for unified data; largest migration 3M records

Professional Experience

DTCFORCE — Italy | Senior Salesforce Consultant / Developer | Nov 2024 - Present

- Architected and delivered a Financial Services Cloud (FSC) implementation for a Canadian government financing authority, configuring the full investment portfolio management pipeline — asset management, bond tracking, and financial accounts — enabling the Government of Canada to manage its investment holdings end-to-end within Salesforce.
- Refactored an inherited FSC implementation for an Ontario government development authority — optimised the data model and restructured financial accounts, project management workflows, and approval processes, then layered Agentforce AI workflows (Topics, Actions, Prompt Templates) on top to simplify and accelerate the pipeline.
- Deployed real-time financial statement generation across 30+ portfolio companies by building a custom AI agent within Salesforce that queries Microsoft Dynamics 365 Business Central via APIs — eliminating redundant data imports and preserving data governance.
- Engineered 12 Agentforce AI workflows comprising 25+ Topics, 40+ Actions, and 15 Prompt Templates across client engagements — reducing manual processing time by 40% and enabling autonomous resolution of 200+ service interactions per month.
- Currently implementing **Revenue Cloud**, with prior **CPQ** delivery experience (quote-to-cash pipelines).
- Developed 30+ custom Apex classes, 8 triggers, 5 batch jobs, and 15 Lightning Web Components (LWC), enforcing code quality, scalability, and Salesforce best practices — reducing manual effort by 25% across user workflows serving 80+ end users.
- Led stakeholder management across 12 cross-functional business and technical teams, produced 40+ technical documentation artifacts and user stories, and drove evolutionary maintenance across 8 release cycles — reducing production escalations by 35%.
- Supported 10+ pre-sales engagements including client demos and solution presentations — contributing to €1.2M in pipeline and a 70% proposal-to-project conversion rate.

CLOUDJUNCTION ADVISORS — Toronto, Canada (Remote) | Salesforce Consultant | Aug 2022 - Oct 2024

- Architected and delivered a full loan origination system on FSC using the mortgage data model — configured the Business Rule Engine for automated underwriting, integrated with Newton and Velocity via REST/SOAP APIs — system designed to handle \$1B+ in pipeline volume per month.

- Architected and configured 15 complete Salesforce orgs for 50+ organisations across Financial Services Cloud (FSC), Sales Cloud, Service Cloud, and Experience Cloud — leading functional setup, custom development, and data migration, with 95% on-time delivery and average 8-week go-live.
- Delivered a 230+ user **Sales Cloud** implementation with a 12-member team — lead-to-order automation with QuickBooks Online invoicing, cutting end-to-end process time by 40%.
- Implemented **Service Cloud** omnichannel case management (4 case types), Knowledge base, entitlements, SLAs, SMS, **Field Service Lightning** work orders and scheduling with Field Service Mobile, and automated document generation (Conga, PandaDoc) with e-signature (DocuSign).
- Built customer & partner portals on **Experience Cloud** — hundreds of users managing orders online, with Agentforce agents explaining order lifecycle conversationally.
- Developed 10+ custom Lightning Web Components (LWC) and Apex classes, automating complex business processes and reducing data entry time by 20% for 50+ users — maintained 90%+ Apex test coverage.
- Built and managed 18 REST/SOAP API integrations with 12 external systems, enabling real-time data exchange — replacing 8 manual processes and handling 50,000+ daily API calls. Collaborated with MuleSoft integration teams on middleware architecture.
- Connected Sage, QuickBooks, and Close with Salesforce; used **Data Cloud** for unified data; largest data migration 3M records.
- Collaborated with 25+ US and Canadian companies — engaging Architects, Functional Consultants, and QA teams — to gather requirements and deliver 30+ projects on time, maintaining a 92% client satisfaction rating.

TPS — Karachi, Pakistan (Part-Time) | Development Trainee | Feb 2022 - Jul 2022

- Wrote 12 Apex classes, 5 triggers, and 20+ unit test classes supporting fintech platform development for a UAE-based financial services client — achieving 92% code coverage and supporting 30+ internal users.
- Created 8 custom Lightning Web Components (LWC) and 5 Visualforce pages, replacing legacy interfaces and reducing average page-load time by 40% for end-user workflows.

SELF-EMPLOYED — Karachi, Pakistan | Freelance Salesforce Administrator & Developer | 2020 - 2022

- Automated 15 business processes using Flow Builder and Approval Processes across 6 client environments — eliminating 20+ hours of manual work per week and reducing process turnaround time by 50%.
- Created 25+ reports and dashboards enabling analytics for 12 business executives, and maintained 80+ users across roles, profiles, and permission sets — cutting reporting turnaround from 2 days to 4 hours.
- Managed standard and custom Salesforce objects, fields, and relationships including Person Accounts and data models across client environments.

Education

- **MSc in Data Science** — In Progress (Expected 2026), University of Naples Federico II — Italy | Sept 2023 - Mar 2026
- **BSc in Computer Science** — 2022, Institute of Business Administration — Karachi, Pakistan | Sept 2018 - Jun 2022

Certifications

- Salesforce Certified Administrator

- Salesforce Platform Developer I (PD1) — exam scheduled
- Google IT Support Specialization — Coursera (2020)

Technical Skills

- **Salesforce Development:** Apex (Classes, Triggers, Batch Jobs), Lightning Web Components (LWC), Visualforce, SOQL, SOSL, Flow Builder, Salesforce APIs (REST, SOAP), DML, Reports & Dashboards, Org Architecture, Data Modelling
- **Salesforce Clouds:** Financial Services Cloud (FSC), Sales Cloud, Service Cloud, Experience Cloud, Marketing Cloud, Data Cloud
- **FSC Capabilities:** Client 360, Financial Accounts, Person Accounts, Relationship Groups, Action Plans, Business Rule Engine, Mortgage Data Model, Financial Accounts Data Model
- **Sales/CPQ:** Lead-to-order automation, CPQ, Revenue Cloud (in progress), QuickBooks Online integration
- **Service:** Omnichannel case management, Knowledge, Entitlements, SLAs, Field Service Lightning (work orders, scheduling, mobile), Conga, PandaDoc, DocuSign
- **Agentforce:** AI Workflows, Topics, Actions, Prompt Templates, Custom Agent Development
- **Integrations:** REST/SOAP APIs, Web Services, Middleware Platforms (MuleSoft, N8n), ERP/CRM syncs (QuickBooks, Sage, Close, Dynamics 365), Cross-System Integration Architecture
- **DevOps:** Copado, Git, CI/CD, Dev Hub
- **Languages & Tools:** Python, SQL, JavaScript (Node.js, Express.js), Java, HTML, CSS, Docker
- **Consulting:** Business Analysis, Requirements Gathering, Solution Design, Stakeholder Management, Technical Documentation, Pre-Sales & Demos, User Stories, Evolutionary Maintenance
